

With the endorsement of

International Arbitration: Technical Disputes and their Quantification

Friday 20 May 2022

Milan, Palazzo Turati - in person / online

[Register here](#)

Introduction

Join this event - either face to face or remotely - to learn first-hand from expert practitioners more about the benefits of effective collaboration among experts and the legal team in International Arbitration.

Through an explanation of the process of analysing and quantifying technical disputes from contributors including [SLCG](#), [HKA](#), [Omni Bridgeway](#) and [MDisputes](#), with perspectives from leading arbitration institution representatives such as ICC and CAM, attendees will gain insight into how international arbitration can provide successful outcomes to address commercial challenges between parties in complex technical disputes. In addition to an explanation of methods adopted, case study examples will be provided followed by Q&A and discussion.

Two sessions respectively covering the technical issues and related quantification will be complemented by a lunch and guest speakers providing insights together with opportunities for networking amongst guests.

This event has been awarded 2 CPD credits by the Italian Bar Association.
